Overview

This project is a **comprehensive group assignment** that allows you to apply concepts learned in this course. You will work with **real data** to answer research questions, perform data mining techniques, and communicate findings through a professional project website.

The project consists of **four milestones** to ensure structured progress. Each milestone builds upon the previous one, and missing any prior requirement must be addressed before proceeding.

- **Project Format:** Hosted on a **GitHub repository** and a **public website**
- **Group Work:** Teams of **three students**
- **Final Deliverable:** Website + Report (8-12 pages in ACM format) + Source Code

Submission Guidelines

All project materials should be submitted via **Canvas** in the following format:

1. **Website URL** (must be publicly accessible)
2. **GitHub Repository URL** (including datasets, code, and reports)
3. **PDF Report** (full project documentation in ACM format)
4. **ZIP File** (containing source code and key results)
5. **Team Contribution Report** (detailing individual contributions)

Milestone 4: Conclusion, Results & Final Report

Objective

Summarize findings, discuss implications, and finalize project documentation.

Presentation on April 21st.
