Details

Milestone 0 is a required checkpoint to make sure your project idea is clear, feasible, and appropriate for this course. This milestone is not graded, but it must be approved before you can begin Milestone 1.

You will receive one of two decisions:

- APPROVED → You may proceed to Milestone 1
- NOT APPROVED (Revise & Resubmit) → You must revise based on feedback and resubmit, and/or contact the CAs/Professor

Submit one PDF (maximum 1 page) with the sections below. Include group number and all team member names. Due date Jan 29th 11:59 PM.

Required content (1 page)

1) Project Description

In 1–2 short paragraphs, include:

- Your main question / goal (specific, not vague)
- Why it matters (who benefits / use case)
- What you plan to do at a high level (analysis type)

2) Data Sources

- List each dataset/datasource you will use (at least 1). For each, include:
- Dataset name + provider/link
- Estimated size (# rows, # columns) or best estimate
- 3–6 key variables you expect to use

Any access constraints (API, login, rate limits, missing data concerns)

3) Potential Bias / Limitations (Required)

List at least 3 potential biases or limitations and briefly explain each (1–2 sentences):

- What could be biased or missing?
- How could that affect conclusions or model performance?
- Add one mitigation idea (how you might reduce or evaluate the issue).

Approval criteria (what we check)

A proposal is typically **APPROVED** if:

- The problem is **clear and measurable**

- The data source(s) are **real and accessible**
- The scope fits the course timeline (not too big / not too vague)
- You identify **reasonable bias/limitations**
- The project is appropriate and follows course policies

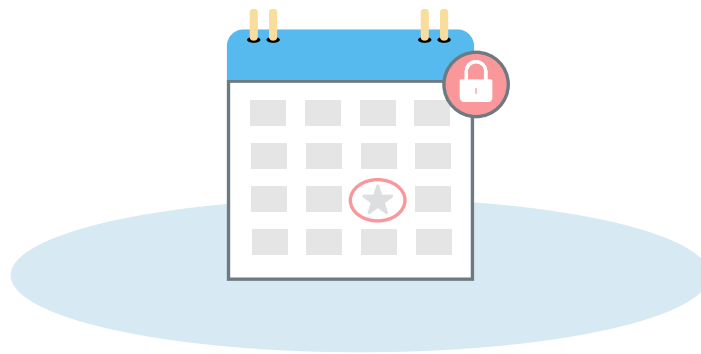

A proposal may be **NOT APPROVED** if:

- Data is not accessible / unclear / too messy to use
- Project goal is too broad ("analyze anything about X")
- Scope is unrealistic (too large, too many datasets, heavy scraping, etc.)
- Missing bias/limitations section
- Ethical/privacy concerns are not addressed

If NOT APPROVED

You must:

1. Follow the written recommendations, and
2. **Resubmit Milestone 0**, and/or
3. Contact the **CAs/Professor** during office hours or by message.
